to multiplayer, where you can directly connect with other players and travel together, the game supports a unique asynchronous online element that allows you to feel the presence of others. **STORY** The Elder Ring occupied one of the numerous worlds in the Lands Between. It produced little disturbance until the time when the fate of the old one had come to pass. The lands that now comprise the Elder Ring are scattered with mana and demon possession is rampant in the lands and in the center of the Elder Ring continent, the imposing Mountain of Ignis stood. Beneath it was a cavern called the Blacktown, and it is said that the Elder Ring was originally created there. The times when the Elder Ring was at its height and it threatened its occupants were the times when it was three hundred years old. Before its creation, the Ether Gate was created to divide the Elder Ring continent into two regions. It is said that the time when the Ether Gate was created is known as the time when the Elder Ring began to decline, as the end draws near. The Elder Ring appears to be over 250 years old, but the people of the Elder Ring continent have memories of how they were created that are more than two hundred years

? Playable Character for All The game contains a playable character with various gender, race, age, and appearance types, and we appreciate your feedback regarding various aspects of the game. □ Story Character with Vivid, Evocative Worlds The game is a "multi-layer" story that unfolds in a setting where the continuity of each individual story is preserved, and every story has its own atmosphere. The Elden world lies between our own world and the parallel world in which Nara and Shion live. It was once a vast and fabulous realm, but Nara and Shion have been forbidden from entering it, and therefore, the Nara and Shion who wait for them feel a grim foreboding. The front of the Elden Ring is a huge world; however, other than the large castle where Shion and Nara live, many parts of the game world are vast fields and plains. You can freely move from one place to another without boundaries, and the size of the world can be adjusted at your own discretion. ? Unique, Innovative System The most unique system in action role-playing games, the "layering system," is implemented in this game. When players reach a story element, they can layer further into the story by branching a lot of routes with a number of choices, and a number of parallel versions of that element can be explored. Furthermore, the story branches can be considered a common route and the parallel versions can be considered an uncommon route. In this manner, the game delivers a vast and three-dimensional world and an immersive experience. There are also a multitude of side stories, which consist of multiple layers that end before you reach the main story line. Players can pass through these stories depending on what they want and the player interface is structured in a similar fashion, so we think you will be able to easily enjoy the game. System Layering: □ A Large Game in a Small Package. This is a large game in the form of an action RPG. However, since the game is in

the form of a diorama, players can freely explore the game world and enjoy the game with a small amount of content. ? Easy to Start, Easy to Immerse This game comes with an easy-to-start experience, since there is a simple introduction when you first click the cover. The game also has a shortening mechanism for letting you quickly

Adventurous toys are being marketed in combination with games for lifelike movement and senses. In addition, reactions and others that are difficult to reproduce with a TV remote are available. For that reason, the education market is advertising interactive education toys marketed in combination with games. On the contrary, the game industry has been partially ignoring the creation of a new type of toy. However, in recent years, game creators have not rejected the belief that is possible to combine a gadget marketed with a game in the future. Aiming for development of this, we have been researching and developing a new product based on an impression of Japanese folklore. This product holds true to
