Transgenic mosquitoes were released in December 1999 in north-west Queensland to stop the spread of the dengue vector Aedes aegypti. We monitored the release site, a semi-rural site 60 km from the closest town and about 16 km north of the nearest coastal point, for the first 5 years of the operation. Antibody to the green fluorescent protein (GFP) was detected in people for only 4 months. Seroconversion to GFP in mice lasted a maximum of 18 months, making it unlikely that the population became permanently established. The sterile insect technique (SIT) was applied to the area in late 2003, and we monitored the area annually until 2014. Mosquitoes kept as eggs or larvae, or collected as pupae, were tested for the presence of GFP. Vector control resulted in an almost 50-fold drop in the abundance of Ae. aegypti. Almost no larvae were found in the region from 2004 onwards, c9d1549cdd

What's new:

Greetings guys, it's time for some Revitalized updates, and my favorite update is definitely the Christie costume! It feels like ages since I've updated, but truth be told, sometimes I just get really busy with college. Sadly, no need to explain what being really busy with college is, we all know that by now. With that out of the way, let's get into the product reviews! Check out this mismatched stockings, they not only look great, they're also very comfortable. I wanted to show you a trailer of Christie, because this took quite a while to make, and to tell you the truth, you might not notice that a LOT of effort has been put into this costume! There's even a behind the scene video for the suspense drama of the cut! The Christie Costume - Skirt If I can confidently say that the Christie skirt worked out well, I believe that it's safe to say that the whole costume went out great. And to be honest, the skirt is at the center of it all. I just always wanted to have a clear view of my legs when in costume, and I'm happy to say that I achieved that. Material is very comfortable, and the waist has not even tried to escape from the confines of the dress. Cut is clean and simple with no gaping, which is exactly what I want in a school uniform. I've always been a fun person while dressing up, but I've found that during my recent experience in cosplay and photography, I've become more conscious of how I dress. As a result, I went all out on this costume. I wouldn't say that anything is really done over the top, but I've tried to think of different ways to approach the build, and in some ways, I think that it just comes down to experimenting a lot. Christie Costume - Stockings So, here is the part that I get to show you guys! Oh, and as usual, please feel free to support me if you want! Materials are from our retailer White Knight and are included in the full listing here. I suppose I should explain the stockings to you guys. The stockings are a very flexible knit in combination with a dusting of elastane. Speaking of elastane, the elastic was a sticky affair and required glue in order for it to
