Collect the Star Power-Ups for the best score! Collect the Bonus Stars for extra points! Use your Time Power-Up to slow down the relentless pursuit of Time! The Stars to collect are: "Power-Up Stars" - increase your score multiplier "Speed Stars" - go from fast to fast "Time Star" - increase your Time Power-Up "Hold Stars" - hold on to the screen and prevent yourself from falling off the bottom of the screen for as long as possible "Speed Up Stars" - make a "graceful" descent, falling only through non-hazardous tiles "Wall Stars" - make a wall of tiles around you to block an enemy's progress "Slow Down Stars" - let an enemy go past you as if they were going nowhere "Disc Black Stars" - let an enemy slip behind you to strike you "Clean Stars" - temporarily clean the screen of tiles to reveal the next tile, but be quick as the tiles will reset in a few seconds! "Shield Stars" - reduce damage done to you "Hit Stars" - have an enemy hit you, and you'll lose the game if you lose a life! "Lives Stars" - restore all your lives! Collecting Stars is Easy! You can capture a star even if you're falling, simply hold down the button as you fall to prevent yourself from falling. Alternatively, you can use the Black Hole power-up, which converts all stars into bonus stars and extra lives. This makes collecting stars easier, as you do not have to watch your progress carefully while collecting. However, the Black Hole makes the game harder because you cannot collect stars while you are falling, so it is important to collect stars as soon as you are safe! If you make a mistake while collecting stars, you have to go to the beginning of the star path and collect the stars again, so be careful not to make any mistakes! Features - 16 Challenging Levels - Intuitive Controls - Easy to read tutorial, with hints to help you along your way - Many Power-Ups - Unique sounds - Complex and challenging Levels - Challenging boss fights - Great for advancing your gaming skills - Lots of replay-ability - 3 Difficulty Settings - 8 Retro Graphics and 16 Levels - Designed for the Game Boy Advance - Includes high-quality and colourful artworks - Support for Game Boy d41b202975

What's new:

Star Wars: Jedi Academy was a multiplatform video game released in 2001 by LucasArts for the PlayStation and Xbox video game consoles, as well as Microsoft Windows, and several mobile phones. It is the first Star Wars video game based on the stories and characters of the Star Wars universe. Players can choose to play as Luke Skywalker, and both a human and a Wookiee character (Seti Ashla and Unkar Plutt). The game uses cel-shaded animation and changes the perspective and storytelling style of previous Star Wars games, to a degree which was later called "bad". The setpieces of the game mostly make use of cinematic portions of the Star Wars films and its first two television series. Gameplay The game presents some basic combat, including mini-games such as lightsaber duels. Other elements included, for example, the Bounty Hunter with his associated mini-game, have been absent. The game also features a distinction between characters such as Luke, who can control three unique attacks (namely Force Push, Force Grip, and Force Push), while the NPC's can only use a Force Punch. The game also features varied puzzles, such as "Who wants the telly?", which involves puzzles utilizing mental or visual challenges (such as mental arithmetic). Cast The main characters and playable characters in the game include: Main Characters: Luke Skywalker (voiced by Mark Hamill) - portrayed in the second film in the Star Wars series, Star Wars: Episode V - The Empire Strikes Back, as a Jedi Master, and as a padawan to Yoda. Luke Skywalker is the main protagonist of the game but sometimes participates in puzzle quests. Unkar Plutt (voiced by Cary Elwes) - portrayed in the same film, as a Wookiee pirate who has recently been freed from the Slave Pits of the notorious Mos Espa. Even though he is portrayed as a pirate with criminal ways of life, he is not completely bad, but good enough to change his pirate way of living for the better. Unkar plans to seek revenge on his old owner, Lady Jetta, for keeping him trapped in the harsh lifestyle of a pirate. He is a playable character who is able to perform Force Push and Force Grab at will, in a way that resembles the villain Separatist droid IG-88, but uses more of the throat button and two thumbs, as opposed to IG-88's single head button.
