Portable WinTrezur is an image viewer, file manager and file encryption tool rolled into a single package. Its interface consists of two different window sections, which are accessed through the applications menu or by pressing the F12 key. In the first window, you can see thumbnails of the images you have selected. You can browse them by simply clicking on them, which will open a viewer that displays the file at its full resolution. The second window is where all the magic happens. It is here that you choose the encryption algorithm you want to use, the quality of the encryption key, how many iterations the process of encryption should have and the folder where you want the resulting files to be stored. Another of the very innovative features of WinTrezur are its password generator and password quality meter. You can also specify how often you want the encryption process to be performed and if you want to disable it for a specific time. Improved user interface and improved support for MS Office files Portable WinTrezur was redesigned from scratch. The new interface is more effective and includes a number of useful and useful features. For instance, the application now makes it much easier for you to choose an encryption option, scroll through the contents of the archive in order to find the images you want to include and then move the selected images into the archive. The new interface makes it much easier for you to transfer the archive to USB devices without losing its files. Another improvement concerns the support for MS Office files.
