So many people enjoy role-playing games like Final Fantasy games and just want a more real world setting. The problem with them is they all follow the same pattern. You run around the world having epic battles with monsters and meet with a wide range of characters along the way. RPG Maker's Blood & Wine is the rare exception because it takes the above mentioned issue and turns it into something fun. Being a fan of RPG Maker games, I knew that Blood & Wine would be a good one. But I didn't expect it to have such an enthralling plot. The story behind it is like a cross between Vampire Hunter D and Batman: The Dark Knight Rises. Humans have forced the Elden to live in a new world between our universe and another. There is a long known Elden place called Elden's Rock. It is considered to be the most important Elden place. There is a secret that the people are all chasing down. It's a powerful weapon that they are all willing to sacrifice to get it. Blood & Wine is described as a fantasy action RPG. This means that there are a number of problems with it. The first problem is that it looks like a game from the 90s. The characters are animated in ways that is hard to understand. The graphics look like they came out of a time machine. Another problem is that you have to choose a class based on which weapon you want to use. It's not as if you can be a hybrid class. Another problem is that you can't choose your party once you start a battle. You must always place your characters based on what character is first in the game. If someone becomes stuck or leaves, then the battle is over. It's not uncommon for players to lose around half of their party. That can be frustrating. Luckily, Blood & Wine has a decent amount of customization. You can choose between ten different classes. Each class has a different weapon. There are also two different main types of armor. The best thing about customization is that it's easy to go wild and create something that looks like a mashup of multiple characters. You can even change their appearance and your own appearances. If you want to create a character that mixes and matches parts from different classes, then you can do that here. Blood & Wine focuses mostly on combat. That means that you can only move around using your skills. The bff6bb2d33
