
Eminem-Crack.A.Bottle.Ft.Dr.Dre. ~REPACK~

Eminem's "Crack A Bottle" will be the second official single from his upcoming "Curtain Call II" album. It's due in stores August 19th. Eminem went on to add that he produced the song. "We were listening to all different types of music, and we came across that song and was like, 'this is dope, this shit is dope', and we pulled up the song on the phone." On the "Curtain Call II", album, Eminem is said to be giving the biggest rap performance of his career. And while it seems like we may be getting another "Cigarettes and Alcohol" in the game, I will say that this album will be tight, no question about it. Eminem was recently interviewed by MTV's Farah Martinez, and during the conversation, when asked about the origins of the song, he said: "I was listening to that song, I was in the car, I was like, 'Damn, this is good. I would do this song' My man 50 Cents did the verses." The official track listing for Eminem's new record has surfaced. The album, which was released on Dec. 16, 2009 is titled Relapse and will be released in four separate parts. Here is the full track listing in three parts: 1. Relapse, 2. Relapse 2: More Trouble Than Its Worth, and 3. Relapse 3: Encore.

Eminem-Crack.A.Bottle.Ft.Dr.Dre.

50 Cent has frequently collaborated with Dr. Dre on albums, but has been with him for a long-time.

In 1999, they released *Get Rich Or Die Tryin*. In 2001, they released *The Massacre*, which set new standards for Hip Hop and featured Eminem on "Dopeman." Another rap

battle war between two of the biggest names in the game exploded right into the studio and back to the streets. The clash was included on The Dr.

Dre Story featuring Snoop Dogg and Eminem titled Boy Meets World and is set for release on December 5. Production was happening simultaneously as the

singer released the album, many of the songs having been written before Christmas and alongside other songs in the albums creation were unveiled. As an example, Hot In Here was written before the sessions started in early 2010, yet was not included in the album for over a year. Then, most

of the tracks were tested on collaborators for the actual recording including Dr. Dre. Released on December 2, 2010, The Eminem Show was an altered and full album of songs to accompany Bad Meets Evil. It features a return to form of the emcee who turned back to his old form, some more

mature style, as well as a laid back jaunt with a couple of blatant production flaws. It was a surprise release to his audience, which also declared Eminem a comeback artist, as he recorded five albums before the 14-year hiatus. The first taste is a song called The Real Slim Shady that actually

refers to the comeback plan for Eminem. It has a different structure and far from the music that came before this one. It also talks about his youth and his struggles for years as a form of self-destruction.

According to the rapper who produced it:
