You can get Injector Pro from here. Q: How to convert dict to tuple? How can I convert the following dict to tuple? If I print (a) I get (0, 'a'), how can I convert it to a tuple without extracting it manually?

a = { 0: 'a', 1: 'b', 2: 'c' } A: You can get the individual fields from the dictionary with the.items() method, which returns a dictionary of tuples: tuple(a.items()) or the items() method of a dictionary: tuple(a.items()) To get a 2-tuple: tuple(a.items())[0] To get a 1-tuple: tuple(a.items())[1] To get a 0-tuple: tuple(a.items())[2] See here for more details about methods. A: tuple(a.items()) will return a tuple with the first key and the first value from the dictionary. A: If you want to get a tuple of a dictionary with just one or two fields, use this: tuple(a.items()[:2])

Injector Pro With Serial Key

Injector Pro is a compact software application whose purpose is to help you rip tracks from audio SFX CDs and insert additional information (track naming options) in the audio files previously ripped from a disc. It comes in handy especially for users that have ripped their Sound Ideas or Hollywood Edge CDs and need to refresh the descriptions. The full name description is burnt into the B WAV files. Clean feature lineup You are welcomed by a clean and simple interface where most of the operations can be selected or deselected with minimal effort. Plus, you may switch between the ripping and injecting mode. Ripping and naming capabilities The program gives you the possibility to pick the CD drive, enable the ripping mode, choose the file format, namely B WAV, OGG, or MP3, and output path, as well as select the best matching descriptions from a drop-down list with collections, such as Hollywood Edge Animal Collection, Hollywood Edge Music Library, Sound Ideas Cartoon Express, Sound Ideas World Series of Sound, and others. Plus, you may upload a custom TAB or TSV file from your computer. When it comes to naming options, you are allowed to add the CD number (before or after the name), add track number to the filename, and remove spaces. Last but not least, you can automatically eject the disc at the end of the process and rip only the selected tracks. Tests revealed that Injector Pro carries out a task pretty quickly and without errors. It is quite friendly with system resources, so the overall performance of the computer is not hampered. Bottom line To sum it up, Injector Pro offers a handy suite of features for helping you rip and inject your sound effects CDs with Broadcast Wave metadata. What's New in the Injector Pro?

All programs listed here have the same purpose and the same goal: to do their jobs well, quickly, and without any efforts. Tests have shown that none of the programs listed in this review can replace Injector Pro because all of them have their own special features. Still, the authors have to admit that Injector Pro is the most feature-rich program in the category.
